

Fast, dependable recovery for Veeam backups

Recover quickly from ransomware, outages, or human error using your existing off-site Veeam backups. BRaaS automates testing and on-demand failover to Bare Metal Cloud, so you can restore operations with confidence and control costs.

Why CyberFortress BRaaS

- **Simple and automated** portal with one-click recovery tests and clear compliance reports
- **Cost control** with Bare Metal Cloud billed only during tests or real events, plus no object storage egress fees with supported providers
- **Confidence at scale** with end-user VPN, optional site-to-site IPsec, and expert assistance available

How It Works

- 1 **Connect backups** stored in Wasabi, Veeam Data Cloud Vault, or Veeam Cloud Connect.
- 2 **Define your plan** for recovery order, access, and networking.
- 3 **Test or fail over** with one click. Operate in the recovery site, then fail back when ready.

Pricing

Annual subscriptions save compared to month-to-month. Bare Metal Cloud usage is billed hourly only during actual use.

	Silver	Gold	Platinum+
Per Month (Annual)	\$149	\$299	\$749
Per Month (Monthly)	\$199	\$399	\$999
Max Recovery RAM	512GB	2TB	4TB
Included across tiers			
Automated recovery playbook	✓	✓	✓
OpenVPN for end users	✓	✓	✓
Scheduled automated DR tests and monthly compliance certificate	✓	✓	✓
End-user-engaged DR testing	✓	✓	✓
Bare Metal Cloud is billed only during actual use	✓	✓	✓

Requirements

- Veeam backups are replicated off-site to a supported object store or Veeam Cloud Connect
- Basic network details for user or site access during recovery
